INTERSURGICAL FORUM

Welcome to the Intersurgical Airway Forum

The Intersurgical Airway Forum is an opportunity to learn more about some of our most innovative and successful devices, including the i-gel[®] supraglottic airway, the Universal Stylet Bougie (USB[™]) and the i-view[™] video laryngoscope. It also includes the opportunity to meet the inventor of i-gel[®], Dr Muhammed Nasir and the inventor of the USB, Dr Richard Levitan.

The Forum

The Intersurgical Forum offers an exciting opportunity for clinicians interested in airway management to:

- Meet and discuss i-gel[®] and the USB with their respective inventors
- Attend a small number of highly focussed lectures on the history and development of i-gel[®], the USB and i-view
- Attend lectures from leading independent clinicians with a special interest in supraglottic airways, video laryngoscopes and bougies and stylets
- Discuss airway devices with colleagues in a friendly and informal setting.

Accreditation has been applied for at:

- Dutch Society for Anaesthesiology (NVA)
- Belgian Society for Anaesthesiology and Reanimation (BVAR / SARB)

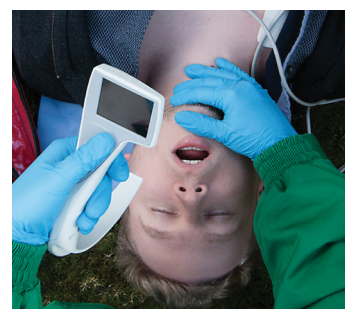

Accommodation will be at the Macdonald Windsor Hotel, located in the heart of Windsor town centre and opposite Windsor Castle, one of the official residences of the British Royal Family, and the oldest and largest occupied castle in the world. Windsor is situated approximately 20 miles west of London.

Leadership through Learning

The programme

Day 1

12.15 – 13.15	Lunch at Hotel
13.15 – 13.30	Welcome & introduction <i>Dave Chapman – Airway Group Product Manager</i>
13.30 – 14.00	Company overview <i>Simone Betz – International Airway Product Specialist</i>
14.00 – 15.30	The USB™ – an introduction <i>Dr. Richard Levitan</i>
15.30	Tea
16.00 – 17.00	The USB workshop <i>Dr. Richard Levitan</i>
17.00	Free time
19.30	Dinner at restaurant, Windsor (TBC)

Day 2

09.00 – 10.00	Research & Development of i-gel® – ‘Is it an ideal SGAD?’ <i>Dr. Muhammed Nasir</i>
10.00 – 11.00	i-gel®: A clinical overview <i>Dave Chapman – Airway Group Product Manager</i>
11.00 – 11.30	Coffee break
11.30 – 12.30	Use of i-gel® in Resuscitation & Emergency Medicine: part 1 <i>TBC</i>
12.30 – 13.30	Lunch in the hotel
13.30 – 14.30	Use of i-gel® in Resuscitation & Emergency Medicine: part 2 <i>TBC</i>
14.30 – 15.30	The single most common cause of death during general Anaesthesia events: under-reported and largely misunderstood <i>Dr. Muhammed Nasir</i>
15.30 – 16.00	Tea break
16.00 – 16.30	Delegate presentations x 2 (15 minutes each)
19.30	Dinner at ‘Gilbey’s Bar & Restaurant Eton’

Day 3

09.00 – 09.30	i-view™ – a new single use video laryngoscope <i>David Chapman – Airway Group Product Manager</i>
09.30 – 10.00	Use of i-gel® as a conduit for intubation <i>Graham Gomersall – International Airways Product Specialist</i>
10.00 – 10.30	Coffee break
10.30 – 12.00	Delegate presentations x 6 (15 minutes each)
12.00 – 12.30	Final remarks and close of meeting <i>Dave Chapman – Airway Group Product Manager</i>
12.30	Lunch (In the hotel)

End of meeting

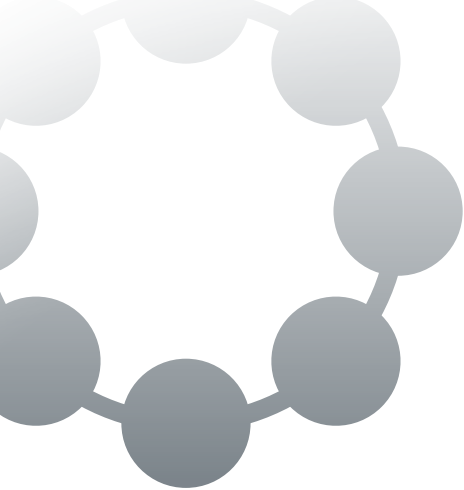

Windsor

Dr. Muhammed Nasir

Dr. Richard Levitan

About the

i-gel[®]

i-gel[®] is designed to allow quick and easy insertion. The ready to use device accurately positions itself over the laryngeal framework to provide a reliable perilaryngeal seal without the need for an inflatable cuff. It also incorporates a gastric channel for improved safety, an integral bite block to reduce the possibility of airway occlusion and a buccal cavity stabilizer to aid rapid insertion and eliminate the potential for rotation.

i-gel[®] is a truly unique airway device and represents the culmination of years of extensive research and development.

About the

i-view[™]

i-view[™] is the new, single use, video laryngoscope from Intersurgical, providing the option of video laryngoscopy wherever you might need to intubate.

By incorporating a Macintosh blade, i-view can also be used for direct laryngoscopy and the technique for insertion is more familiar and instinctive than for devices with a hyper-angulated blade. Ready to use seconds after removing from the packaging, the ergonomic design ensures i-view is easy to use, and the integral LCD screen provides an optimal view in a variety of light conditions.

About the

The Universal Stylet Bougie (USB[™]) is a combined intubating bougie and stylet and represents a significant advance in the design and development of tracheal tube introducers (bougies) and stylets.

The unique design of the Universal USB incorporates two metal inserts with different and distinct properties in-between a more flexible middle section. The USB can easily be manipulated to a variety of angles when used as a stylet, yet has the flexibility when used as a bougie to provide a significantly enhanced level of tracheal ring feedback.
