

DART-Reach™

Laryngo-tracheal mucosal atomisation device

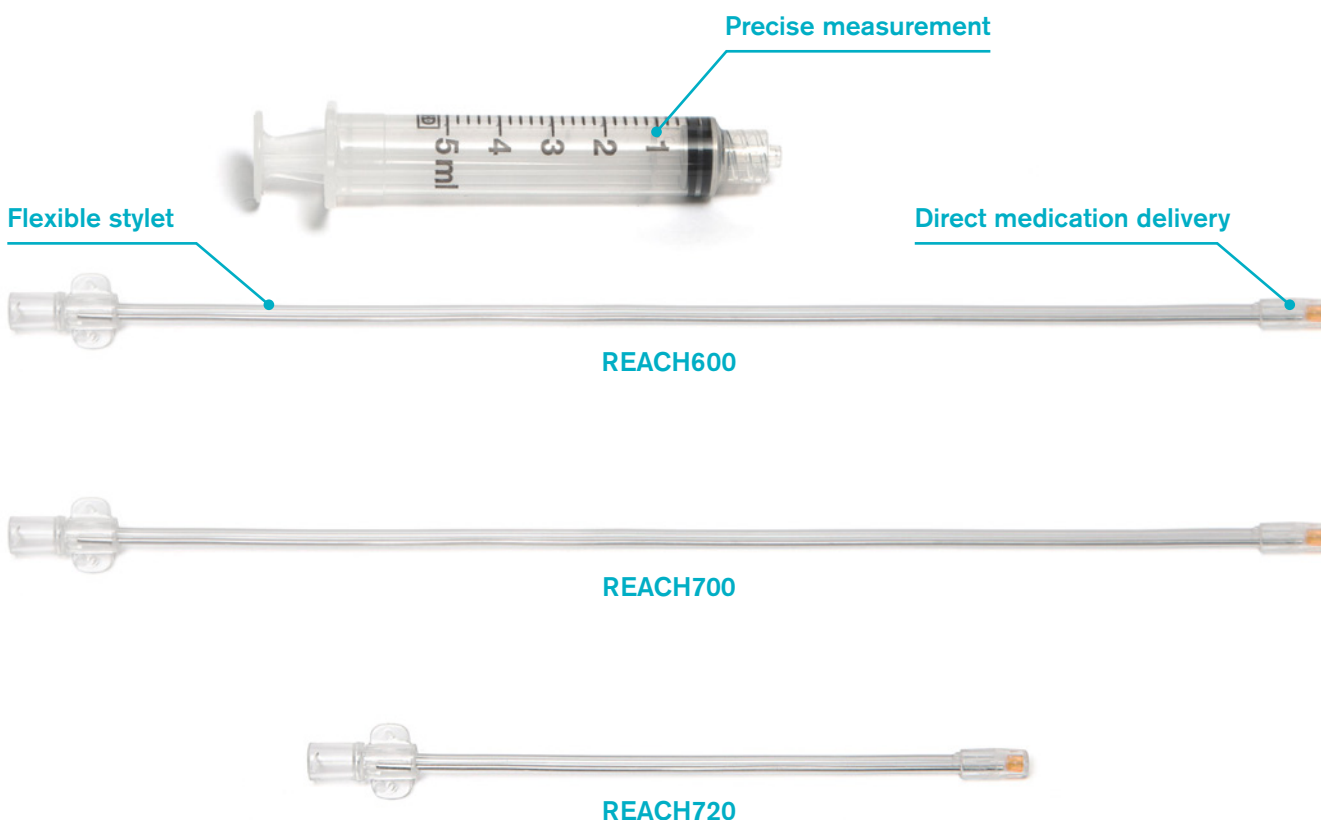

Airway Management ▪ Atomisation Devices

DART-Reach™ laryngo-tracheal mucosal atomisation device

Precise and direct atomisation delivery

DART-Reach is indicated for atomising solutions across the naso, laryngeal and oropharyngeal mucous membranes with an average particle size of approximately 50 µm. Medication can be delivered quickly and effectively for difficult airways with the DART-Reach. The device has a flexible stylet, which allows for a customised approach and can be used in a variety of procedures, including awake intubations, difficult intubations, bronchoscopy and trans-oesophageal echocardiograms.

Our DART-Reach range includes a number of product options, including options with and without a syringe as well as two different lengths of stylet (218 mm and 117 mm). All DART-Reach devices are single patient use and packaged in boxes of 25 units.

Code	Description	Box Qty.
REACH600	DART-Reach atomisation device with 5 ml syringe, 218 mm	25
REACH700	DART-Reach atomisation device, 218 mm	25
