

Cirrus™ 2

A range of nebulisers and kits

Oxygen and Aerosol Therapy • Nebuliser Therapy

Cirrus™2 nebuliser and nebuliser mask kits

The Cirrus2 features a graduated nebuliser cup which provides guidance on how much medication is in the nebuliser. The cup has a quick-release fitting which enables the nebuliser to be attached, as well as detached, with a quarter turn. This speeds up the filling process and provides a reliable seal between the cup and the nebuliser body.

The Cirrus2 nebuliser is designed to deliver medication for tracheobronchial deposition. Nebuliser performance specifications are detailed in documentation provided with the products.

The Cirrus2 mask kits incorporate the Intersurgical EcoLite™ aerosol mask, this non-PVC mask reduces the environmental impact of this product.

Standard 22F Taper

Fits masks, T-pieces and mouthpieces

Quick-release fitting

Attaches and detaches easily

Graduated nebuliser cup guide

Faster preparation

Low residual volume

Reduced drug waste

Self-sealing T-piece

The Cirrus2 is available with a self-sealing T-piece, which enables the nebuliser to be attached (or detached) from the ventilator without interfering with patient ventilation or inadvertently activating any alarms.

Welcome to the Comfort Zone

The unique design and materials used to manufacture the Intersurgical EcoLite mask provides improved patient comfort and a reduced environmental impact.

Comfortable for the Patient

Improved patient comfort and safety has been key to the development of the Intersurgical EcoLite mask. The latest manufacturing technology has enabled us to combine two non-PVC and therefore phthalate free materials in the same product. The polypropylene material forming the body of the Intersurgical EcoLite mask is clear, lightweight and rigid enough to maintain the masks shape, whilst the second softer TPE material is utilised in the seal, which is in contact with the patients face.

Comfortable for the Environment

The Intersurgical EcoLite mask is an important part of our Eco range, designed as part of our ongoing focus on sustainable development. Various groups have questioned the use of PVC in medical products and its impact on the environment. The utilisation of alternative materials has resulted in the elimination of PVC from the Intersurgical EcoLite mask, reducing the environmental impact.
