

Intersurgical EcoLite™ paediatric mask range

Oxygen and Aerosol Therapy ▪ Paediatric Masks

Intersurgical EcoLite™ paediatric mask range

Welcome to the Comfort Zone

The unique design and materials used to manufacture the Intersurgical EcoLite mask provides improved patient comfort and a reduced environmental impact.

Comfortable for the Patient

Improved patient comfort and safety has been key to the development of the Intersurgical EcoLite mask. The latest manufacturing technology has enabled us to combine two non-PVC and therefore phthalate free materials in the same product. The polypropylene material forming the body of the Intersurgical EcoLite mask is clear, lightweight and rigid enough to maintain the masks shape, whilst the second softer TPE material is utilised in the seal, which is in contact with the patients face.

Incurved nose seal

Improving the fit and eliminating the need for a separate nose clip. Designed to minimise the risk of oxygen entering the patient's eyes

Soft face seal

For improved patient comfort

A choice of "under chin" or "on-chin" positions

Provides a better fit on a wider range of patient face shapes

Comfortable for the Environment

The Intersurgical EcoLite mask is an important part of our Eco range, designed as part of our ongoing focus on sustainable development. Various groups have questioned the use of PVC in medical products and its impact on the environment. The utilisation of alternative materials has resulted in the elimination of PVC from the Intersurgical EcoLite mask, reducing the environmental impact.

Lighter

50% lighter than a PVC mask, more comfortable for the patient

Greener

The elimination of PVC from the masks has dramatically lowered their environmental impact

The shape and position of the exhalation ports have been designed to minimise the amount of rebreathed carbon dioxide

The material forming the body of the mask is clear, permitting visualisation of the patient's nose and lips. It is also rigid enough to maintain the mask's shape during transportation and use
